## Why are SDG syntheses needed?

*“Regrettably, the SDGs were already off track even before COVID-19 emerged. Progress had been made in poverty reduction, maternal and child health, access to electricity, and gender equality, but not enough to achieve the Goals by 2030. In other vital areas, including reducing inequality, lowering carbon emissions and tackling hunger, progress had either stalled or reversed.”*

*- António Guterres, Secretary-General of the United Nations, 2021*
